Figure 1: Graphical representation of mean environmental value for environment 4 to 10. Equation determining the environment is given in the main manuscript. Mean environmental value for environment 4, 5 and 6 are respectively equivalent to environment 1, 2 and 3.
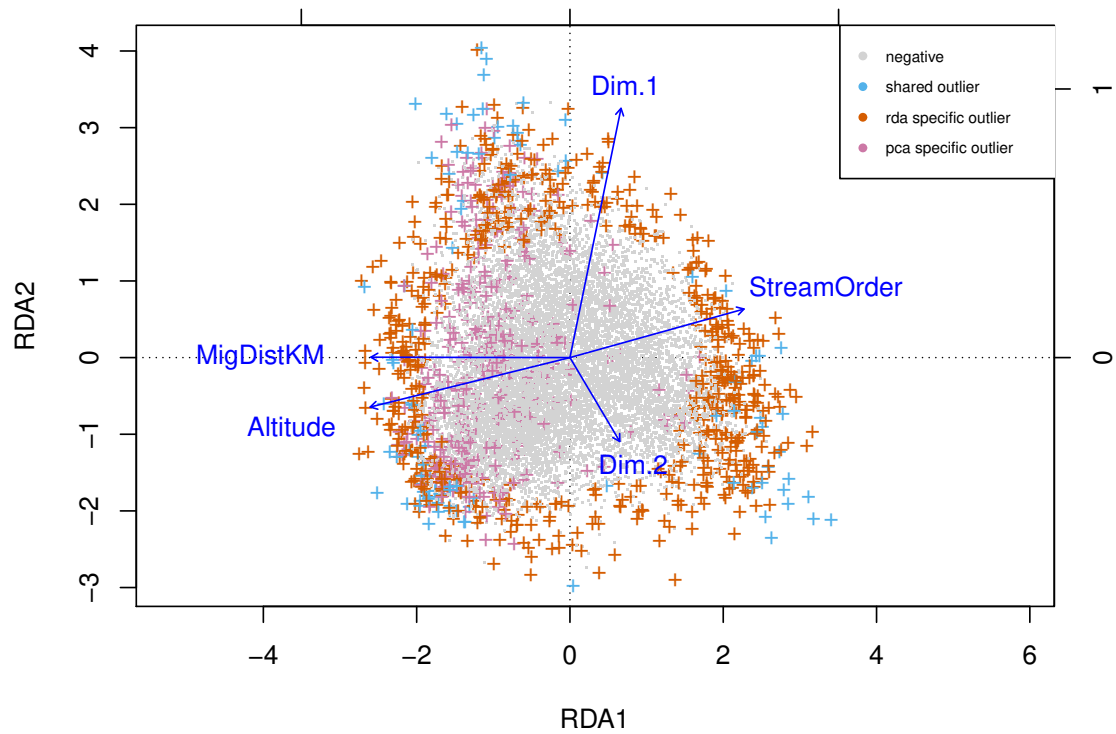

Figure 2: RDA genome scan on Chinook Salmon data. The first two axis RDA1 and RDA2 explain XX and XX% of variance. Specific and shared outliers between PCA based method and RDA based method are differentially colored.
